PERSONAL DETAILS

Full Name:	Shalom Chipunza	Date of Birth:	15 September 2004
Sex:	Male	Nationality:	Zimbabwean
Marital Status:	Single	ID Number:	49-148297L42
Religion:	Christianity	Postal Address:	House No. 2 Runnymede Walk, Mt Pleasant, Harare
Website	https://shalom-chipunza.vercel.app/		

PROFESSIONAL SUMMARY

Aspiring Artificial Intelligence and Machine Learning student passionate about cutting-edge technology, data science, and solving real-world problems through innovation. Highly motivated, hardworking, and collaborative, with strong teamwork and problem-solving abilities. Thrives in team environments and values collective growth and shared success. Eager to apply analytical thinking, technical skills, and continuous learning to contribute to impactful AI and data-driven solutions.

PERSONAL ATTRIBUTES

- Strong problem-solving and analytical thinking skills
- Excellent teamwork and collaboration abilities
- Highly motivated and eager to learn emerging technologies
- Adaptable and quick to grasp new concepts
- Hardworking and goal-oriented
- Effective communication and interpersonal skills
- Passionate about Artificial Intelligence, Machine Learning, and Data Science

ACADEMIC QUALIFICATIONS

BSc Honours in Artificial Intelligence & Machine Learning

August 2024 – August 2028 (Expected)

University of Zimbabwe

- Currently pursuing studies in Artificial Intelligence, Machine Learning, Data Science, Programming, and Emerging Technologies.
- Developing skills in problem-solving, data analysis, software development, and intelligent systems.

Relevant Coursework (Core Modules):

- Machine Learning
- Artificial Intelligence and Expert Systems
- Data Structures & Algorithms
- Web & Mobile Computing
- Database Design and Development
- Physical Computing & the Internet of Things
- Software Engineering
- Operating Systems and Computer Architecture
- Statistics
- Discrete Mathematics
- Linear Algebra
- Data Communications & Computer Networks
- Calculus
- Electrical and Electronic Principles

Advanced Level Certificate 2023

Kotwa High School (2024)

Computer Science	A
Pure Mathematics	C
Business Studies	D
Communication Skills	PASS

TECHNICAL SKILLS

Programming Languages	Python, Java, C, C++, JavaScript, TypeScript
Frameworks & Libraries	React.js, Node.js, Spring Boot
Databases	PostgreSQL, SQLite
AI / ML	Machine Learning, Intelligent Systems, Data Science
Embedded Systems	ESP32, IoT Sensors (DHT22, MQ2), C/C++
Other	Full Stack Web Development, Mobile Application Development, System Integration, Real-Time Monitoring

PROJECTS

IntelliVent — Smart Ventilation & Air Quality Monitoring System

An IoT-based intelligent ventilation system designed to monitor and respond to environmental conditions in real time using embedded sensors and microcontrollers.

- Real-time temperature, humidity, and air quality monitoring
- Gas leak detection using MQ2 sensors
- Motion detection for automated system response
- Automated alerts for hazardous environmental conditions
- Centralized monitoring dashboard

Technologies: *ESP32, C/C++, React, SQLite, IoT Sensors (DHT22, MQ2)*

SmartSale — Mobile First Point of Sale System

A mobile-optimized Point of Sale system designed for retail environments with offline functionality and real-time inventory tracking.

- Offline sales processing and transaction support
- Real-time stock and inventory management
- Sales tracking and reporting system
- Mobile-first responsive interface
- Local database synchronization

Technologies: *React, TypeScript, Node.js, SQLite*

SmartSchool — Hybrid School Management System

A full-stack school management platform designed to simplify academic and administrative operations.

- Student, teacher, and admin authentication system
- Fee tracking and academic records management
- Timetable and scheduling system
- Results and performance management
- Role-based access control with centralized dashboard

Technologies: *React, Java, Spring Boot, PostgreSQL*

EarnLink Store — E-Commerce Platform

A modern e-commerce web platform for digital products and services with a scalable architecture.

- Product listing and management system
- Responsive and user-friendly shopping interface
- Scalable backend architecture
- Modern UI/UX design for online marketplace

Technologies: *React, Node.js, JavaScript*
